Delivery Times

Stock Items: Finishes/combinations shown in this pricelist - 10 days

Standard Projects: Standard components, alternate mix of 'Motion Felt' / Eurotex PU upholstery - 70 days

Custom Projects: Non-standard components or non-standard upholstery - 100 days

Warranty

Frame: 10 years

Fabric: Motion Felt 5 years

Eurotex PU: 2 years

Freight

Please check with your Distributor for Freight Policy.

Assembly

Assembly is required for the majority of MotionOffice products and is not included in the product price.

Custom Items

30% deposit is required on custom orders. All custom orders must go through the MotionOffice Configurator at motionoffice.com or any custom items not shown in this document or on the configurator must go through a sign off process. The above delivery times maybe subject to change based on fabric & order information and international holidays. Some custom fabrics according to manufacturers specifications may be unsuitable. Please check with your MotionOffice sales representative when placing your order.

Standard wall materials absorb 3%, MotionOffice has been tested and absorbs 76% of sound waves!

Imagine standing in the middle of a room with all concrete surfaces and one open window, and you blow a loud whistle. The sound that hits the open window passes right through. The sound that hits the concrete surfaces in the room begin to reflect back. The NRC (Noise Reduction Coefficient) of the open window would be 1.00 which is the absence of sound reflection. The NRC of concrete is .03, indicating that 97% of the noise that hits the concrete surfaces will reflect back off the surface. The NRC value of a surface simply denotes its ability to absorb vs reflect sound. The higher the NRC value, the stronger the sound absorption and the lower the sound reflection in the room.

MotionOffice panels have an NRC rating of 0.76 which means that 76% of the sound wave entering into the material will be captured and converted. MotionOffice dramatically contributes to reduction of noise bleed in open plan environments!

MotionOffice Acoustics - absorbs 76% of sound waves!

KEY:

- MotionOffice Materials
- Glass
- Concrete
- Gypsum Board (Gib Board)

Motion Felt

Motion Felt can be used to upholster all MotionOffice products.

Motion Felt is a wool blend textile with a soft hand and contemporary colour-ways that will add a subtle, elegant distinction to larger, upholstered furniture items.

Motion Felt is yarn dyed and has been milled to give it a direction-less felted appearance. The milling process also increases the inherent durability and water repellent properties, which along with the natural flame resistant properties of wool, makes this fabric very suitable for heavy commercial use.

Technical Specifications

Type:	Upholstery
Composition:	50% Wool 50% Polyester
Weight:	750g/lin.m
Roll Width:	150cm
Repeat:	None
Abrasion:	100,000 rubs (Martindale)
Pilling:	4-5, BS EN ISO 12945-2:2000
Light Fastness:	4-5, BS EN ISO 105-B02
Flammability:	BS EN 1021.1 (cigarette) BS EN 1021.2 (match) CAL TB 117-2013
Colour Matching:	Batch to batch variations in colour may occur within commercial tolerances

Maintenance & Cleaning

Wool is naturally anti-static and water repellent making it less likely to attract dirt and absorb spillages. It is important to keep the fabric clean as this will extend the life of the fabric and preserve its fire retardant properties. Frequent (weekly) vacuuming on low suction is advised to remove dust and loose soiling. Under normal commercial use we recommend cleaning 1-3 times yearly by a professional dry cleaning service. It is important to protect the fabric from direct and refracted sunlight as this will ensure that the fabric retains its original colour.

Spot Cleaning

Soiling should be acted on immediately to prevent lasting damage to the fabric. We always recommend testing stain removal detergents and solvents on an inconspicuous area first.

- Immediately absorb any liquids with an absorbent cloth.
- Scrape off any solidified material with a spoon.
- Remove loose material with a vacuum cleaner on low power.
- Wipe clean with a damp cloth using pH-neutral upholstery shampoo (follow directions on packaging). Do not scrub or use a stiff brush.

- Use clean water without any cleaning product for the final clean.
- Do not use dish washing or laundry detergents. Do not use detergents, bleach, ammonia or soap intended for hard surfaces.
- Dry with a clean white cloth using a circular dabbing motion to avoid edge marks. Use of hair dryer may also help avoid edge marks.
- Allow to dry thoroughly before reusing.

This is intended as a guide only. We recommend consultation with a fabric care professional.

Environmental

As a caring, corporate citizen, we support the responsible stewardship of the earth, its inhabitants and its resources.

Our fabrics are designed and made to last, and in their manufacture, use and disposal, embody the environmental principles of Reduce, Reuse & Recycle.

Fire retardants are bromide free.

Dyes are free from heavy metals.
