# ABW OFFICE

Activity based working provides people with the power of choice! Choosing from a range of environments that best suit the task at hand from high to low focus, and individual to collaborative tasks. ABW allows team members to freely move around the space and find a setting that will allow them to easily collaborate or focus.

This is another area where attention to detail goes a long way, and OLG provide a wide range of knowledge and options to help create a fully customised and personalised ABW Office.

# OFFICE

Modern offices come in all shapes, sizes and configurations – from the modest, one-desk den, to open-plan hubs spanning entire building levels. Regardless of complexity, all office environments should be designed to promote comfort and productivity in the workplace.

OLG has the knowledge and experience required to provide office interiors that complement your corporate identity. Everything can be customised, right down to the individual components and detail in the joinery.

# EDUCATION

Modern classrooms and training facilities are designed to promote freedom of thought and clarity of mind. Open, flexible learning environments are often preferred, and furniture is integral to the success of this endeavour. OLG education options allow you to create stimulating learning environments where students and facilitators can stay focused and innovative.

# ACCOMODATION

Student accommodation spaces need to be durable, consistent and practical. The OLG production can be changed and tweaked to fit in with the aesthetics, sizes and fitout quality required. Smart design principles are applied to ensure easiest installation process possible and best in class fittings are used to ensure long term quality. (our hinge range has been tested to 20 times the global standard for durability) Melamine Joinery, steel frames, fabric features and loose furniture are all within our capabilities.

# COMPONENT SUPPLY

Our long journey on offshore manufacturing has bought many connections in many different areas. Basic light steel fabrication to sheet metal componentry; injection moulded plastic parts to engineering grade components; engineered stone to solid phenolic surfaces; all this combined with an understanding of when to use a short manufacturing run versus a making a mould for mass production. Our team can quickly assist with advice, cost & lead time estimates from the most cost effective, trustworthy sources in the world.
