

Luxe Home Desk

Product Data Specification

Luxe Home Desk

The All New Luxe Home Desk features a durable 6mm thick tempered glass worktop with rounded corners and a robust surface which is stain, scratch and temperature resistant. It features an LED touch screen display for easy control and operation with a contemporary design combined with energy saving technology. The 6mm tempered glass worktop is supported by a high quality light-weight stainless steel frame for additional durability and comfort. Powered with 2 x high speed USB ports for all your device charging needs. The Luxe home desk glass worktop is supplied with a high quality, light weight steel frame providing up to 90kg of static load for premium durability and peace of mind. Equipped with a powerful high quality turbine motor for dependable, yet quiet operation. The Luxe also features an 'Intelligent Rebound' anti collision system that activates when it detects objects that may interfere with the movement of the desk.
