

Cable Cobra.

The Cable Cobra is a flexible cable management duct designed to be used to take cables between floor - fixed height desks, or cable tray-desktop on height adjustable desks. They can also be 'daisy chained' together to create longer ducts (e.g. floor to ceiling Umbilical). Cable Cobras are quiet and unobtrusive when moving as part of a height adjustable desk set-up.

Features

Manufactured in hard white or black plastic parts to create a 1.08 metre duct

1.08 Cable lengths can be joined together to create a floor to ceiling Umbilical

Cables are loaded to the plastic parts from a division in the side of each piece

Available in Black or White plastic.

Partitioned links to segregate cables

Multiple mounting options

Cobras are quiet in motion with the movement of sit/stand desks
